I recently completed an OSSD program at GLCT and I can't be happier with that. Teachers here are really good and they are always passionate to help us with our questions and our class materials and they always ensure that you understand the class material completely. Also, they are really friendly and they're always here to answer our questions and give us additional information to help us achieve our goals.

Tirth Tusharkumar Patel

Being part of the Principal Advisory Group taught me valuable leadership skills and I always cherish the moments of the meetings. So if you're looking for a way to spice up your academic experience, I would highly recommend joining the Principal Advisory Group and the Student Council.

Venessa Joseph-Samarani

I can confidently declare that the intellectual services provided by the Great Lakes College of Toronto are of utmost quality. Whenever we seek help or we don't understand certain concepts, our teachers always, always come to our aid. And in addition to this, we have after hour classes to help you know other students who didn't really understand what was taught in the class.

A GREAT PLACE TO EDUCATE YOUR CHILDREN

Alumni – Dr. Collin Oghor (Class of 2009)

After I left Great Lakes College of Toronto, I went to McMaster University, where I studied the Bachelor of Science Honors in Psychology, Neuroscience and Behavior. Right after that, I did a joint Doctor of Medicine, Master of Surgery and Master of Business Administration program at McGill University in Montreal. After that, I worked with the United Nations in Geneva, where I was working on access to tuberculosis diagnostics across the world. Then I joined McKinsey & Company, where I worked in public health consulting across the African continent.

I am about to begin a Master of Public Health in Health Management degree at Harvard University in Massachusetts, USA. I will be combining this with running my startup healthcare technology company. As I started off with this, my foundation really in Canada was Great Lakes College of Toronto.

I came here wanting to study medicine in 2009, wanting to be a doctor, and they helped me to lay out that plan on how I could eventually achieve those dreams. And I'm glad to say that I eventually achieved those dreams. And I have to say that is largely due to the foundation that I had at Great Lakes.
